SKILLS

Programming Languages: Python, Java, HTML, CSS, SQL
Tools / Platforms: Git, GitHub, AWS, Docker, MacOS, Linux, MySQL
Frameworks/ Libraries: Django, Numpy, Pandas, Matplotlib, Pytorch, Tensorflow, Hugging face
Technical Skills: Object Oriented Programming, Data Structures and Algorithms, Machine Learning, Operating Systems, Database Management System

PROJECTS

BreakMoney - Expense Management & Debt Simplification Platform | [Live](#) Mar' 26 - Jun' 26

- Developed a Django-based expense-sharing system that automatically works out the minimum number of payments needed to settle group debts, using a custom netting algorithm.
- Structured the database to handle group expenses split by exact amount, percentage, or equal share, while keeping every transaction accurate and consistent.
- Added secure login, friend/group management, and automatic balance updates, so users see real-time changes in who owes what and optimized Django ORM queries.
- Tech Stack: Python, Django, Django ORM, SQLite/PostgreSQL, HTML/CSS (server-rendered templates)

AutoSched - Autonomous Personal Productivity & Planning Agent | [GitHub](#) Jan' 26 - Feb' 26

- Programmed an autonomous planning agent in Python that follows an Observe → Reason → Plan → Act → Reflect → Remember loop to prioritize tasks, catch overload, and reschedule automatically.
- Formulated a rule-based scoring system for task priority and effort - combining importance, deadline pressure, and past performance - that gives clear, explainable results without using machine learning.
- Set up a memory system that lets the agent learn from missed tasks, correct its own estimation errors, and steadily cut down schedule overload over repeated runs.
- Tech Stack: Python, rule-based logic, JSON, SQLite

TRAINING

Advanced Python for ML & AI (CSE PATHSHALA) - Resume Ranker | [GitHub](#) Jun' 25 - Jul' 25

- Created a working prototype that automates candidate's resume screening, reaching 88% match accuracy and cutting initial screening time by 37%.
- Wrote a ranking model that converts resumes and job descriptions into vectors and compares them for similarity, producing a consistent score between 0.0 and 1.0.
- Studied bias and fairness issues in AI hiring tools — especially how gender and experience act as unfair proxies — and outlined ways to make automated screening more equitable.
- Tech Stack: Python, scikit-learn (TF-IDF vectorization, cosine similarity), pandas, NLTK for text preprocessing

CERTIFICATIONS

Advanced Python for ML & AI | [CSE Pathshala](#) Jul' 25
Unrevealing Basic Python towards ML/AI | [CSE Pathshala](#) Mar' 24

CERTIFICATES

Docker Training Course for the Absolute Beginner | [KodeKloud](#) Apr' 26
Complete 2026 Python Bootcamp: Learn Python from Scratch | [Udemy](#) Jan' 26
Master Generative AI & Generative AI tools | [Udemy](#) Aug' 25

ACHIEVEMENTS

- Achieved HackerRank's Skill Certification Tests - [Software Engineer](#) & [Problem Solving \(Intermediate\)](#) Mar' 26
- Solved 100+ DSA problems across LeetCode, GFG & HackerRank, sharpening problem-solving skills Feb' 26
- Top 10 in Smart India Hackathon 2024 Sept' 24

EDUCATION

Lovely Professional University Punjab, India
B.Tech. - Computer Science and Engineering (AI and ML) - CGPA: 8.42 Aug' 23 - Present

Bal Bharati Public School Gurgaon, India
Intermediate; Percentage: 76.2% Apr' 22 - Mar' 23

Bal Bharati Public School Gurgaon, India
Matriculation; Percentage: 91.2% Apr' 20 - Mar' 21
